

Name: Grady A. McEvoy

Office: House of representatives

District: 69

E-mail address: gmcevoy@emerytelcom.net

Website:

Age: 51

Occupation: Instructor at College of Eastern Utah

Residence: Price

Years at Residence: 21

Qualifications: I have served on the Carbon School Board (the largest employer in Carbon County) for eight years and currently serve as the President of the School Board with oversight of a 30+ Million dollars budget. I have knowledge of the legislative process and experience in debating and interpreting the issues surrounding legislation and experience in implementing new legislation. I have a strong background in personnel issues as well as the impact and implications of creating personnel policy. As a board member, I have developed and implemented new policies while avoiding decisions which would have been detrimental to our students' education. I have overseen the implementation of both state and federal programs and negotiated issues for the school district. This position combined with my position as Theatre Department Chair at CEU have built a strong understanding of all levels of education and the value that education adds to our communities and our children. I am a strong supporter of our Public Education system. I have also served on multiple committees at the college and in the community. Some include serving as the Faculty Senate president twice, serving on the Southeast Applied Technology (SEATC) Board and serving as SEATC board president for one term. My most memorable committee experience has been working with the Basso Dino Mine Adventure Park a wonderful community project which brought over 3000 community members together for one week to build the park. Most important is that I listen to all sides of an issue, research the information and then make my decisions based on what I believe is best for the whole.
